INTRODUCTION AND PURPOSE

Adventist Health System/West, a California nonprofit religious corporation ("Adventist Health") is the sole member of Paradise Valley Hospital ("PVH" or the "Hospital") located in National City, California. PVH has requested the California Attorney General's consent for the sale of substantially all of its assets including the hospital, and outpatient pavilion, three neighboring medical office buildings, a skilled nursing and assisted living facility, associated property and certain associated intangible assets, to Prime Healthcare Services, Inc. a Delaware for-profit corporation and Prime A Investments, Inc., a Delaware for-profit limited liability company ("Purchaser" or "Prime").

This report, prepared for the Office of the Attorney General, describes the possible effects that the proposed transaction may have on the delivery, accessibility and availability of healthcare services in the service area.

Medical Development Specialists, Inc. ("MDS"), a healthcare planning and policy consulting firm, was retained to analyze the "health impacts" of this proposed transaction. MDS has prepared this report based upon the following:

- A review of the documents filed with the Attorney General by Adventist Health dated November 6, 2006, in its request for consent to the transaction;
- Review of various press releases and news articles related to PVH and other hospital sales transactions;
- Interviews with community members and representatives, PVH medical staff, PVH management, PVH Board members, the Chairman and the President of Prime, other Prime executives, Adventist Health executives, the Director of the County Emergency Medical Services, the interim Director of San Diego County Mental Health and others;
- An analysis of financial, utilization and service information provided by PVH management and the California Office of Statewide Health Planning and Development ("OSHPD");
- An analysis of area healthcare services using OSHPD data and the findings from the 2005 California Health Interview Survey; and
- The 2006 San Diego Healthcare Safety Net Study and other various sources.

BACKGROUND AND DESCRIPTION OF THE TRANSACTION

The Hospital, which was purchased in 1904 to be a Seventh-day Adventist Healthcare institution, is currently licensed for 301 beds and offers services including emergency, obstetrics, pediatrics, rehabilitation and mental health as well as other inpatient and outpatient services.

PVH is a member of Adventist Health, which is headquartered in Roseville, California and operates healthcare facilities throughout California, Hawaii, Oregon and Washington. The system includes 20 hospitals with more than 3,100 beds, 19,000 employees, numerous clinics and outpatient facilities, 16 home care agencies and three joint-venture retirement centers.

The Paradise Valley Hospital Foundation also exists as a separate nonprofit organization to raise funds for the Hospital's capital projects and expansion. The Foundation's Board consists of about 20 community members including physicians, attorneys, business leaders and others. The Foundation raised over \$600,000 in contribution revenue in 2006 and has approximately \$425,000 in net assets as of October 31, 2006. The Foundation is not included in the sale and will continue to operate with a mission to support community healthcare needs independently of the Hospital.

Reasons for the Sale

About a year ago, in response to declines in overall profitability as well as expectations for capital requirements of over \$1.2 billion for seismic and other facility improvements in the next 10 years, Adventist Health states that it went through a strategic evaluation process with its Board. As a result of that process, Adventist Health determined that it could not afford to sustain PVH's financial losses and needed to preserve capital to the meet seismic requirements at other owned facilities.

PVH had reported losses on operations in all years from 2001-2005 ranging from approximately \$2 million to \$7 million per year. Additionally, seismic related renovations for PVH were estimated at \$61 million in 2000. Because of these circumstances, the Adventist Health Board of Directors determined that the organization could not afford seismic improvements to PVH and would need to sell the Hospital or close it within the next 5 years, before 2011.

In 2006, PVH's financial condition progressively worsened as a result of the following:

- Increasing bad debt and charity care expenses;
- Overall expense increases; and
- California State mandated increases in nurse staffing ratios.

Then, sometime around midyear 2006, Adventist Health management states that it was approached by Prime about the opportunity to purchase PVH and on September 19, 2006 the Board of Directors for Adventist Health voted to authorize management "to negotiate an asset

transfer agreement with Prime Healthcare and to bring that agreement to the Board for final approval."

Summary of the Acquisition Agreement

The major provisions of the Acquisition Agreement, dated October 27, 2006 include the following:

- Prime will purchase substantially all of the assets of PVH including the Hospital with approximately 30.5 acres of land, Hospital property, three neighboring medical office buildings on approximately 4.5 acres of land, property leases, equipment, inventory, supplies, assets, etc. for \$30 million;
- Prime will not purchase accounts receivable;
- Prime intends to extend offers of employment to substantially all current employees of the Hospital at their current level of compensation and with the same benefits;
- Prime will comply with its charity care policies as in effect at its other hospitals;
- Prime agrees to maintain medical staff privileges for medical staff members in good standing as of the closing date;
- Prime agrees to form a local advisory committee of medical staff and community leaders; and
- Prime agrees to accept the California Attorney General conditions "provided that they are reasonably related to ensuring that purchaser continue to preserve current Hospital services and continue to provide current charitable medical services and community benefit programs."

Use of Net Sales Proceeds

After paying for the debts and obligations of PVH, the remaining assets are intended to be distributed to Adventist Health which is organized and operated exclusively for religious purposes and is tax exempt under Section 501(c)(3) of 1986 Internal Revenue Code. Adventist Health intends to use any proceeds for PVH after paying off outstanding obligations, including bond indebtedness of approximately \$12 million to continue its mission in communities served by other religious institutions that are controlled by Adventist Health.

Excluded Assets

The sale of PVH does not include the following projects and services that are expected to be continued forward by Adventist Health:

- 1) Paradise Walk: a community of 96 town homes intended for hospital employees as an aid to recruitment and retention. PVH sold the land to the Olson Company for development;
- 2) Paradise Village: a 12 acre senior community development with 406 independent living units and 92 assisted living units; and
- 3) The Home Health Program that provides approximately 23,000 visits annually.

PARADISE VALLEY HOSPITAL'S PROFILE

General Information

PVH is a 301-bed general acute care facility with its main campus located on 2400 East Fourth Street, National City, California, 91950, on approximately 54 acres of land. The physical plant of the main campus area being sold consists of 237 beds and support facilities totaling approximately 216,000 square feet, an adjacent outpatient clinic and medical office building with 70,646 square feet, a skilled nursing and assisted living facility with 75,000 square feet, a historic residence and five single family homes situated on approximately 30.5 acres. Additionally, PVH owns three neighboring medical office buildings and leases the Bayview Behavioral Health facility. Additional information includes:

- PVH has a total of 301 licensed beds with 64 of the psychiatric and chemical dependency beds located at its Bayview Campus at 330 Moss Street, Chula Vista, California, 91911;
- PVH has a facility for assisted living (50 beds) and skilled nursing (86 beds) that is operated under a lease by the Paradise Valley Healthcare Center, also known as the Paradise Valley Manor;
- PVH owns three additional medical offices buildings:
 - 1) 502 Euclid Medical Office Building is on 2.19 acres of property and has 95,320 square feet.
 - 2) 610 Euclid Medical Office Building is on 0.75 acres of property and has 32,701 square feet.
 - 3) 2345 East 8th Street Medical Office Building is on 1.63 acres of property and has 70,856 square feet.
- In 2005, Paradise Valley Hospital had an average census of nearly 206 patients (including Bayview). While the census has fluctuated in late 2006 due to many factors it has recently been reported in January 2007 to be approximately 200 patients;
- PVH is an important safety net hospital being the third largest provider of services to underinsured residents (Medi-Cal, County indigent and other indigent) of both the south and central areas of San Diego County as measured by total inpatient discharges;
- PVH is the largest provider of Behavioral Health Services in San Diego County;
- PVH has a home health agency that provided approximately 23,000 patient visits in 2005. There is also a partial hospitalization (an outpatient psychiatric treatment program) program, which provided 25,497 visits in 2005;
- PVH had 2,162 obstetrical deliveries in 2005 and had 1,973 through November of 2006; and
- The Hospital has 186 active medical staff members and, as the largest employer in National City, employs 1,131 full-time equivalent employees.

PVH's 237 acute care beds (198 General Acute Care and 39 Acute Psychiatric) are licensed as follows:

| Total | 237 |
|--------------------------------|-----|
| Acute Psychiatric | 39 |
| Unspecified General Acute Care | 118 |
| Coronary Care | 5 |
| Pediatric Services | 10 |
| Intensive Care Newborn Nursery | 10 |
| Intensive Care | 10 |
| Rehabilitation Center | 22 |
| Perinatal Services | 23 |

PVH's Bayview Behavioral Health, which is a leased facility from Rush Properties of Del Mar, California, has 64 beds licensed as follows:

| Total | 61 |
|------------------------------|----|
| Chemical Dependency Recovery | 18 |
| Acute Psychiatric | 46 |

Some key statistics about PVH are as follows:

| Paradise Valley Hospital | | | | | |
|------------------------------------|--------|--|--|--|--|
| Fiscal Year 2005 Key Statistics | | | | | |
| Acute Licensed Beds | 198 | | | | |
| Psychiatric Licensed Beds | 103 | | | | |

Programs and Services

PVH is a community hospital that offers primary and secondary medical and surgical healthcare services that are common to most general acute care hospitals. Specialized programs and services include a rehabilitation center, perinatal program, pediatric program, and acute psychiatry and chemical dependency programs. The list of services includes:

- 24-hour emergency services;
- Perinatal services: normal nursery, obstetrics, special care nursery;
- Mental health/behavioral health services;
- Healthy Beginnings/Nueva Esperanza: drug rehabilitation for mothers/expectant mothers;
- Orthopedics;
- Rehabilitation: physical therapy, occupational therapy, recreational therapy and speech therapy;
- Home care services: home care, certified home health, private duty nursing, home infusion therapy, home medical equipment;
- Paradise Family and Senior Health Centers;
- Surgical services: outpatient and inpatient;
- Intensive care unit (ICU) and coronary care unit (CCU);
- Definitive observation unit (DOU);
- Pediatrics:
- Cardiac catherization lab;
- Center for Wound Care and hyperbaric chamber;
- Radiology (X-Ray): digital angiography, mammography, magnetic resonance imaging (MRI), nuclear medicine, spiral computerized tomography (CT), ultrasound and bone densitometry;
- Dialysis;
- Laboratory/pathology;
- Cardiology;
- Radiology; and
- Respiratory therapy

Seismic, Certification and Accreditation Issues

An executive summary was prepared by Degenkolk Engineers of Los Angeles, California regarding studies prepared in response to Senate Bill 1953 legislation that requires all California Hospitals to evaluate and report to Office of Statewide Health and Development (OSHPD) the expected seismic performance of acute care hospital buildings.

Based on this report, prepared on January 14, 2000, the main tower, west wing and storage building were designed and constructed before the 1973 Hospital Seismic Safety Act and require strengthening by 2013 or must be removed from service.

The east wing and emergency room expansion were designed after 1973 and meet requirements for 2013, but must be strengthened by 2030 to achieve required ratings.

The cost to make all renovations to all buildings for compliance to 2030 standards was estimated in 2000 to be \$61 million.

In August of 2006, several inspections from the Center for Medicare and Medicaid Services found multiple deficiencies that required corrections to avoid a cut off of federal reimbursement. PVH is required to make changes to maintain Joint Commission on Accreditation of Healthcare Organizations certification.

Additionally, on September 27, 2006, an inspection from JCAHO identified several serious problems involving infection control and medication management. These problems also put PVH's accreditation at risk unless corrected.

Patient Volume

The following table shows patient volume trends at PVH for fiscal years 2001 through November of 2006.

| PATIENT DAYS Medical ICU/CCU | Paradise Valley Hospital - Service Volumes | | | | | | | | |

A review of historical utilization trends supports the following conclusions:

- The overall average daily census 206 in 2005 was relatively consistent for the last four years consisting of approximately 80 psychiatric patients and 126 non-psychiatric patients. Thus, an average of approximately 95 licensed beds has been unoccupied;
- Total discharges between 2001 and 2005 grew by 10.2%, while total patient days grew by only 3%;
- Both inpatient and outpatient surgeries have been relatively stable over the five-year period;
- The Pediatric and NICU services have a very small census of between 2-3 patients each;
- Deliveries have consistently increased over the time period, reaching over 2,000 per year since 2004;
- Psychiatric adult days increased about 16% from 2001 to 2005 while psychiatric child days decreased by almost 47% in the same time period;
- NICU discharges have decreased significantly since 2001; and
- Emergency visits, home health, partial hospitalization and cardiac cathertizations have all increased significantly since 2001.

Payer Mix

Medi-Cal is the largest payer at PVH, representing approximately 39% of annual discharges (2005) with Medicare comprising 32%. Third party managed care (commercial) patients were comparatively a very small proportion of discharges accounting for only 8% of all patients. Additionally, the Hospital had 4% of discharges in the indigent categories (uninsured/poor), which is a relatively high percentage compared to other hospitals in California.

^{*} Other includes self-pay, workers' compensation, other government and other payers.

Source: OSHPD Financial Disclosure Report, FYE 12/31/05

Medical Staff

PVH has 186 "active" physicians on the medical staff and a nearly full complement of physician specialties. There are 13 psychiatrists on the medical staff. This is comparatively high because of the large psychiatric program. Only 80% of PVH's active medical staff is board certified which is comparatively low for a hospital (normally closer to 85% or higher).

Financial Profile

PVH has grown net operating revenue from \$91,538,063 in 2001 to \$134,315,873 in 2005, which is a 47% increase in four years. However, PVH reported losses in fiscal years 2003 and 2004 of over \$3 million combined. In 2005, operational expenses increased by nearly \$7 million over fiscal year 2004 with only a small increase in patient volume. The Hospital's operating margin in 2005 was -4.8% which is substantially lower than the average of California hospitals' operating margin of -1.0%. PVH has consistently lost \$2,000,000 to \$6,800,000 on operations, before considering non-operating revenue.

PVH's current ratio of 1.97 (current assets divided by current debts) is slightly stronger than the statewide average of 1.45. PVH's bad debt percentage at 4.3% is more than double the state hospital average of 1.9%.

Cost of Services

The operating cost of services by payer category, which includes both inpatient and outpatient care, was calculated for the past five years. In 2005, 45.4% of PVH's total costs were associated with Medicare patients and 32.0% of all costs were from Medi-Cal. Third party payers comprised 11.3% of overall costs.

The cost of services provided for County indigent and other indigent patients has steadily risen from \$4.6 million in 2001 to \$5.7 million in 2005.

The majority of the cost is associated with services to Medicare and Medi-Cal patients with approximately 77% of the \$140,700,000 associated with these two payer categories.

Charity Care

Because different sources of hospital reports of charity care charges often differ, MDS relied on the final OSHPD reports and the OSHPD website which reported the same numbers for five fiscal year periods as follows:

| OSHPD Charity Care Paradise Valley Hospital Fiscal Years 2001 to 2005 | | | | | |
|---|---------------|--|--|--|--|
| Year | Total Charges | | | | |
| 2005 (1) | \$4,455,471 | | | | |
| 2004 | \$8,665,732 | | | | |
| 2003 \$8,679,156 | | | | | |
| 2002 | \$7,274,237 | | | | |
| 2001 | \$7,035,618 | | | | |
| Average 2001 - 04 \$7,913,686 | | | | | |
| (1) PVH is revising 2005 Charity Care number; 2005 was not included in the average calculation because of the pending revision. PVH's fiscal year ends 12/31 | | | | | |

The charity care total charges have risen from \$7 million in 2001 to \$8.7 million in 2004.

An interview with PVH's CFO indicated that the 2005 OSHPD Disclosure Report inclusion of charity care was inaccurate and is being revised. This revision would include an increase to Charity Care (which is unavailable at this time).

The following table shows a comparison of charity care and bad debt for PVH and all hospitals in the State of California. The four-year average of charity care and bad debt for PVH as a percent of gross patient revenue was 6.3%. This is much greater than the state average of 3.1%.

The PVH Cost of Charity Care table shows the charges for charity care adjusted to cost based upon applying the Hospital's ratio of cost to charges for each year. The cost of charity care decreased from \$3,094,320 in FY 2001 to \$2,176,980 in FY 2004 (FY 2005 excluded because of pending financial reporting revisions). The average cost of charity care for the four years was \$2,532,839.

The cost of charity care compared to total costs was 3.1% in 2001 and decreased to 1.6% in 2004.

Community Benefit Services

As required by California Senate Bill 697, PVH has completed annual community benefit plans. The Hospital has supported initiatives involving community education, screening programs, patient transportation and various programs designed for youth and seniors.

The Hospital staff has been actively involved in various community collaborations for health education and prevention. In 2005, the cost for community benefit services was \$98,803. Additionally, PVH donated \$194,088 to various organizations including \$72,500 to the Campanile Foundation and \$10,000 to the San Diego Academy.

The largest community benefit program supported by PVH involves the provision of transportation services. Approximately 75% of the transportation services provided by PVH employees and vehicles involve Bayview psychiatric patients. The remaining transportation services are used to transport patients for various outpatient services. For 2004 and 2005, costs for transportation services averaged \$884,000. In combination, PVH's total annual community benefit services are about \$1.2 million.

In addition to Community Benefit Services, PVH has offered County grant-funded programs that serve the community as shown below. While both ALLY programs can be continued with the change in ownership to Prime, the other grant-funded programs would need to be shifted to other nonprofit organizations, but they would not be lost to the community.

Prime Healthcare Services

Prime owns and operates seven hospitals, all of which are in Southern California. Four hospitals were only recently acquired, while three have been operated for a year or more. Information for these three hospitals, Desert Valley Hospital ("DVH") in Victorville, Chino Valley Medical Center ("Chino") in Chino and Sherman Oaks Hospital ("SOH") in Sherman Oaks, is shown on the following table. The hospitals are licensed by the State of California Department of Health Services and accredited by the Joint Commission on Accreditation of Healthcare Organizations or the American Osteopathic Association. DVH has been recently recognized in "Solucient's" 100 Top Hospitals: Benchmarks for Success program for the "Small Community Hospital" category. A profile of the hospitals is provided in the table below:

¹⁹

Some important observations about the table include:

- County indigent volumes are either small or non-existent because of the presence of County Hospitals in Los Angeles and San Bernardino Counties.
- The proportion of uncompensated care (bad debt and charity care) provided by these three hospitals far exceeds statewide hospital averages.
- While all three hospitals are profitable, Chino Valley Medical Center's profitability is overstated, according to Prime Executives, because of the Hospital sales transaction and related treatment of expenses and debt.
- DVH and Chino both treat a sizeable number of Medi-Cal patients (15% and 35% respectively).
- DVH and Chino both treat a sizeable number of managed care patients.

Prime's Chairman, Dr. Prem Reddy, stated that the organization's goal is to successfully operate small primary and secondary care hospitals. His intention is to expand and improve the services at PVH, to grow market share and improve financial performance. He has also stated Prime's commitment to maintain or expand key services, add new services and continue providing historical levels of charity care. Prime's business strategies to turn around acquired, financially distressed hospitals have included:

- Cancellation of existing managed care contracts and a re-negotiation for higher rates for contracted insurers. Non-contracted insurers get billed at non-discounted rates;
- Capital investment in equipment and facility upgrades;
- Use of 24 hour-a-day Hospitalist services and medical oversight and management programs to reduce the average length of stay. This is especially important with regard to Medicare patients where the combination of a lower length of stay that decreases costs and a fixed payment per patient increases profitability;
- Close monitoring and control of costs, which includes elimination of some physician contracts, including physician specialty "on call coverage payments" when they are not dictated by either market conditions or required to maintain necessary hospital services;
- Emphasizing policies or facilities expansion to increase patient volume while reducing ambulance diversions and patient waiting time in the emergency department;
- Financing acquisitions and capital investment improvements by virtue of the sale-lease back of facilities to a REIT (Real Estate Investment Trust). Prime has used Medical Properties Trust in prior transactions and intends to do so for PVH but after the transaction closes. Medical Properties Trust is a real estate company that is traded on the New York Stock Exchange (symbol MPW). It acquires, develops and leases healthcare facilities providing healthcare services. Facilities are leased to experienced healthcare operators pursuant to long-term net leases that require the tenant to bear most of the costs associated with the property. Properties include acute care hospitals, rehabilitation hospitals, ambulatory surgery centers, medical office buildings, and other types of healthcare facilities.

Sherman Oaks Hospital ("SOH") represents the only non-profit acquisition to date by Prime. Prime provided the following information to MDS from a recent OSPHD submission. It shows a net income of almost \$5 million for three quarters of operation and about \$10 million of uncompensated care (bad debt and charity care).

The fiscal year prior to Prime's acquisition of Sherman Oaks Hospital and Health Center (fiscal year 2005) was compared to the annualized first three quarters of 2006 annualized. Patient discharges have increased by more than 3% (from 5,120 to 5,285) in comparison to fiscal year 2005 and 2006.

The patient days declined from 28,507 to 22,178 (22.2%) because the length of stay decreased by an average of 1.37 days per discharge.

Traditional Medicare was the only payer category to decrease in patient discharges (from 68.6% to 55.3%).

SOH went from a \$5 million loss before acquisition to an annualized profit of over \$6 million after acquisition.

The following table shows a profile of the four other hospitals recently acquired by Prime. All four are small hospitals, three of which were losing money in the most recent fiscal year.

Because these hospitals were only recently acquired, no comparisons were available regarding before acquisition and after acquisition.

PARADISE VALLEY HOSPITAL VALUATION/SALES PRICE

The valuation of hospitals is an art and a science, because there can be many variables, intangibles and assumptions that need to be considered, some are based on opinion rather than fact. A fundamental premise in determining the fair market value of a hospital is the earnings history and potential, the location, convenience and reputation of the facility and that of its physicians, technicians, nursing, payers and patients. In the valuation performed by The Camden Group ("TCG"), three valuation methods were used. The first was a Discounted Cash Flow Method where debt-free cash flow was estimated for five years and then discounted to today's value. An assumption was made that the Hospital would lose money in the current year and in the years following. Losses in the most recent years were as follows:

| 2003 | \$1,100,257 |
|------------------|----------------|
| 2004 | \$1,901,832 |
| 2005 | \$5,064,767 ** |
| YTD Aug 31, 2006 | \$3,824,801 |

^{**} excludes other revenue of \$5,292,993 for a one-time gain from the sale of land

TCG assumed that these losses would escalate quickly to about \$9 million next year and to \$17 million by year five. Due to the assumption by TCG a valuation on future cash flow was given no merit. The second method of valuation was the Market Method that uses market comparables of similar hospital transactions. This was also not given merit because it was believed that any value would be discounted because of seismic retrofit expenses. The recent sale of Alvarado Hospital for a reported \$22.5 million, according to a Tenet Healthcare Corporation press release, provides a comparative example for PVH. The side by side comparison is shown below:

| Hospital Sales Comparison FY 2005/2006 | | | | | |
|---|-----------------------------|------------------------------|--|--|--|
| | Paradise Valley Hospital | Alvarado Hospital Med Ctr | | | |

| Uncompensated Care as % of Chgs. | 5.1% | 2.1% | | | |
| State of Calif. Uncompensated Care | 3.1% | 3.1% | | | |
| Fiscal Year Ending | 12/31/2005 | 12/31/2005 | | | |
| Source: OSHPD Financial Disclosure Reports | | | | | |

The comparison shows that Alvarado had \$2 million lower losses on operations. While licensed for a similar number of beds it had a much lower inpatient volume. However, both had similar total net revenue with Alvarado having a much higher Medicare payer mix and much lower uncompensated care.

TCG used the third valuation method – an Adjusted Net Asset Method. This method values the tangible and intangible assets of the Hospital, deducting the costs of deferred maintenance to bring those assets back into normal working order but not improving the revenue generating ability or reducing the expenses of the facility. This makes the assumption that the purchaser of the Hospital is buying it as a going concern and plans to continue operating the facility as a hospital with no eventual gain from real estate. It also makes the assumption that the purchaser

of the facility will be able to return it to profitability in order to make the investment financially viable to them. The valuation analysis performed by TCG places the value of PVH at approximately \$6.5 million on a going concern basis. This valuation method does not necessarily value the facility at its maximum value to an owner that, based on a review of the information presented in TCG report, may be in the sale of the real property, medical office buildings and equipment separately after five years of operation. Based on the information in TCG report, the assets may be worth at least \$30 million based on the following break down:

| Land Value (Per real estate appraisal) | \$20,600,000 |
|---|---------------|
| Medical Office Buildings (Per real estate appraisal) | \$8,960,000 |
| Equipment Sale (20% of current written down value) | \$6,145,000 |
| Demolition of Buildings (Per Casper Company estimate) | (\$3,169,000) |

Total \$32,536,000

If the assets were sold in this manner and the Hospital closed, the community would lose the benefit of the healthcare services for a minimum of five years. The five year time period is based upon Prime's stated commitment to operate the Hospital for at least five years. Should the current seismic upgrade requirements remain in place under S.B. 1953, it is unlikely that any purchaser of the facility would invest the funds required to bring it up to code, unless they had been able to substantially improve on the profitability of the facility.

PARADISE VALLEY HOSPITAL HEALTHCARE SERVICE AREA DESCRIPTION

Paradise Valley Hospital within the Safety Net

The County of San Diego and the California Endowment funded a project that produced a report in September of 2006 entitled "San Diego County Healthcare Safety Net Study." Below are key findings of the study that relate to PVH's role in the safety net:

- Demand on safety net providers has increased over the past ten years with steady increases in community clinic visits, emergency department visits and hospital discharges;
- Hospital expansion is projected to grow less than demand;
- Gaps in inpatient beds and emergency treatment beds are forecast;
- The south region where PVH is located:
 - Is expected to have the largest percentage average annual growth (1.3%).
 - Is expected to have the largest proportion of Hispanics in 2020 (61%) and California Latinos are nearly twice as likely to be uninsured.
 - Has the largest proportion of uninsured (21%).
 - Has the largest proportion of safety net consumers (41%) compared to San Diego County as a whole (30%).
 - Is projected to have the largest growth of uninsured and Medi-Cal.
 - Had the most patient days by underinsured payers (Medi-Cal, County indigent, other indigent and other payers). Over 50% of patient discharges were underserved compared to 34% for the County.
 - Has the largest projected future need for beds.
 - Is at risk for losing two hospitals.
 - Has a robust network of community clinics.
 - Has the second highest bed occupancy rate at 71%.
 - Has a shortage of physicians.
- San Diego County licensed psychiatric beds have declined 29% since 1995;
- San Diego County emergency departments were on diversion an average of 11% of the time, which was down from 2001, when they were on diversion 31% of the time;
- Over the next twenty years San Diego County healthcare demand is expected to increase:
 - 32% for community clinics

- 37% for hospital beds
- 16% for emergency department beds
- 27% for physicians
- UCSD Medical Center has announced the move of all 385 inpatient beds to a 500 bed hospital on their La Jolla campus by 2030, retaining outpatient services at Hillcrest;
 - In 2004, approximately 14% of UCSD's patients were from the south region and 35% were from the central region.
- PVH is the third largest provider of inpatient services to safety net patients from the central region (18% of the underinsured discharges);
- PVH is the third largest provider of inpatient services to safety net patients from the south region (19% of underinsured discharges);
- UCSD Medical Center, Hillcrest serves:
 - 24% of underinsured patients from the central region.
 - 11% of underinsured patients from the south region.
- Due to the lack of plans for new beds, the central and south regions will be over capacity by 2015 without even considering the plan for the move of UCSD; and
- Results of stakeholder interviews ranked the greatest demand for safety net services as:
 - Primary care
 - Mental health
 - Emergency department services
 - Education and prevention
 - Chronic decreases/diabetes

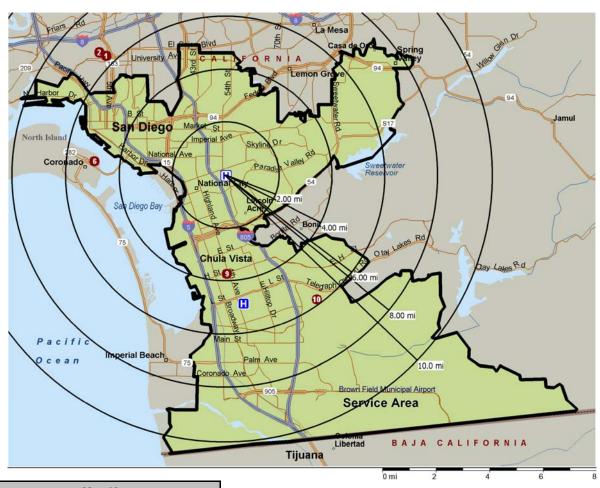

Paradise Valley Health Service Area Definition

Approximately 81.0% of PVH's discharges come from a combination of 12 area ZIP Codes and outside the US (the majority of which are from Mexico). Patients from outside of the United States, apparently, are a result of a program to attract pregnant women from Mexico in their last stage of pregnancy to the Hospital for delivery. The patient discharges from outside of the United States account for 4.8% which ranks 6th to area ZIP Codes in total discharges. The homeless population utilization of PVH represents 2.0% of the Hospital's discharges. Over 50% of PVH's discharges emanate from the top five ZIP Codes in the service area.

| Total Hospital | | 13,264 | 100% | | 92,459 | 11.6% | |

Service Area Map

PVH's service area is shown in the map below. There are 10 other acute hospitals within ten mile radius of PVH with one other hospital within a 4 mile radius, Scripps Mercy Hospital – Chula Vista. Eight of these ten hospitals are located north/northwest of PVH. PVH's service area boundaries span more to the south and southeast. Approximately 81.0% of PVH's total inpatient discharges emanate from within the service area.

- Map Key
- H Paradise Valley Hospital H Bayview Behavioral Health
- 1 Scripps Mercy Hospital
- 2 UCSD Medical Center
- 3 Children's Hospital
- 4 Grossmont Hospital
- 5 Kaiser San Diego
- 6 Sharp Coronado
- Sharp Memorial 7
- 8 Alvarado Hospital
- 9 Scripps Mercy Hosp-Chula Vista
- 10 Sharp Chula Vista Med Ctr

Demographic Profile

PVH's service area has a total population of 677,574 (2006 estimate). It is projected to grow by 5.6% over the next five years which is greater to the 4.1% expected growth rate of California.

| Paradise Valley Hospital Service Area Population Statistics 2006 & 2011 | | | | | | |
|---|---------|---------|----------|--|--|--|
| | 2006 | 2011 | % Change | | | |
| Total Population | 677,574 | 715,394 | 5.6% | | | |
| Households | 202,307 | 213,278 | 5.4% | | | |
| Avg. Household Size | 3.27 | 3.28 | 0.3% | | | |
| % Female | 50.0% | | | | | |
| Source: Claritas, 2006 | | | | | | |

The average age of the population in the service area is 33.2 years. For the State of California, it is 33.7. The percentage of adults, age 45-64, is expected to grow at a faster rate than other age cohorts. Meanwhile, the percentage of youth, ages 0-14, and younger adults, ages 15-44, in the service area will decrease by more than 3%. The percentage of seniors is lower than the current statewide average of 12%, and it is expected to increase by 2.5% over the next five years.

The Hispanic population is projected to grow at the fastest rate in the service area, increasing to 58.5% of the total service area population by 2011. The only other ethnic group to increase over the five year period is Asian. The White and Black populations are projected to decline as a percentage of the total.

The service area average household income (aggregate household income divided by total households) is \$53,587, and it is projected to grow by 12.5% in the next five years. This is considerably lower than the State of California's average household income of \$63,000. Approximately 16% of households in the service area are below the federal poverty level (\$15,260 for a family of three in 2006).

Area Payer/Insurance Mix

Nearly 21% of the service area population is Medi-Cal eligible. This is slightly higher than the State average of 18%. Percentages of Medi-Cal eligibles for ZIP Codes within the service area ranges from 12% to 32%.

The ZIP Code where the Hospital is located, National City, is very high with 26% of residents being Medi-Cal eligible.

Selected Health Indicators¹

A review of health status indicators for San Diego County (deaths, diseases and births) supports the following conclusions:

- The area faces some challenges related to obstetrics and prenatal care (Refer to Table A);
 - The infant mortality rate (4.9 per 1,000 births) is higher than the national goal (4.5) but lower than the California rate (5.3).
 - The percentage of low birth weight infants (6.2%) is lower than the State rate (6.6%) and but higher than the national goal (5.0%).
- The overall mortality rate is lower than the California mortality rate (Refer to Table B). Chronic diseases are the main cause of death with heart disease and cancer accounting for almost half the mortality rate; and
- Chlamydia is the most frequently reported disease in the county and exceeds the incidence rate for California. The rates of incidence of AIDS and TB are both significantly higher than the state rate (Refer to Table C).

The following tables are based on California Department of Health Services reports regarding San Diego County:

| Table A: Natality Statistics 2006 | | | |
|--|-------|-------|-------|
| Low Birth Weight Infants | 6.2% | 6.6% | 5.0% |
| Late or No Prenatal Care | 12.3% | 13.0% | 10.0% |
| Birth Rate to Adolescents (per 1,000 births) | 36.4 | 39.2 | N/A |
| Infant Mortality Rate (per 1,000 births) | 4.9 | 5.3 | 4.5 |

Hospital Supply, Demand and Market Share

There are 11 general acute care hospitals within 12 miles of the Hospital. Additional hospitals beyond this geographic region also have a significant market share of area patients because of their specialized programs, referral patterns and reputation.

An analysis of the services offered by PVH comparing them to services offered by other providers is shown below. The hospitals shown below were the primary facilities analyzed to determine area hospital capacity by service. In general, the service area currently has sufficient general acute care beds based upon licensed bed capacity and occupancy rates.

| | Area H | lospitals | | | | | |

As indicated in the table below, the following are key hospital benchmarks for the service area:

- There were more than 70,000 total discharges (2005);
- Sharp Chula Vista Medical Center has the largest market share, as determined by the percentage of inpatient discharges, with 14.7%;
- PVH had an average of 14% a market share over the past three years; and

• PVH is in a very competitive market with six other facilities in combination accounting for about 70% of the market share.

Denotes market share leader

Market share for acute hospitals is calculated by using the percentage of acute discharges from a hospital within the service area.

- The largest category of inpatient discharges by payer is traditional Medicare with over 17,000 discharges (24.6%). PVH is the market share leader in this category with 19.2% market share;
- PVH leads the service area in traditional Medi-Cal with 21.0% of the discharges;
- PVH has about 13.6% of managed Medi-Cal discharges; and
- PVH has a small market share of managed Medicare patients and Workers compensation payer categories.

- PVH's overall market share for this area is 13.9%, a close second to Sharp Chula Vista MC with 14.7%.
- PVH is the market share leader for psychiatry (39.9%), rehabilitation (38.2%) and plastic surgery (30.4%).
- PVH shares the highest market share for medical-ophthalmology with Scripps Mercy, both draw 14.8%.
- The highest number of service line discharges was in medical-cardiovascular medicine with 7,995 discharges. PVH's relative market share was 16.3% in this service line.

PVH has an array of services typical of a community hospital. The majority of services provided by PVH are also provided by other providers in or near the service area. However, PVH is unique in the service area in providing psychiatric and rehabilitation services.

The following grid shows a comparison of local hospitals and the services they provide as compared to the services of PVH:

There are ten other Emergency Departments (ED) within a 12 mile driving distance of PVH (as indicated in the table on the following page). Nine of the EDs are basic, while UCSD Medical Center is a comprehensive ED. Kaiser also has an ED in the area that would bring the total to 11 EDs. There are a total of 301 stations in the area that had over 500,000 visits (2005, most current data available).

PVH operates 20 emergency stations/beds with over 38,000 visits in the calendar year 2005. Grossmont Hospital has higher emergency volumes in Moderate and Severe patients than any of the other hospitals in the area. Grossmont Hospital also has the largest number of emergency stations (64).

The American College of Emergency Physicians ("ACEP"), representing 22,000 members nationally, uses a benchmark of 2,000 visits per emergency station/bed to estimate the capacity of emergency departments. Based upon this benchmark, the PVH emergency department is operating close to capacity.

Most other area hospitals also report visits per bed per year below the ACEP benchmark except for Sharp Chula Vista Medical Center. On an aggregated basis, the 12 area hospitals collective "occupancy" rate based on existing bed capacity is 87% (based on the 2,000 visit standard).

The Department of Health Services also uses a general use rate of 2,000 visits per station as an identifier of total capacity. The table on the following page identifies which hospitals are over or under that threshold.

Of the 11 area hospitals, other than PVH, eight of them are under the threshold identified by the Department of Health Services.

| Hospital | Total Visits | Level | Stations | Approximate Capacity (Visits) (1) | Remaining Capacity (Visits) | Miles from |
|----------------------------------|-----------------|---------------|----------|-----------------------------------|-----------------------------------|------------|

Paradise Valley Health Clinics

According to PVH, two clinics are operated under the Hospital's license.

1. The Paradise Senior Health Center:

The senior center clinic of the hospital provides a combination of medical and social services to seniors. It is located at 610 Euclid Avenue, across the street from the Hospital. Physicians provide over 9,000 patient visits a year at the center. According to PVH, the clinic operates close to financial breaking even.

2. The Paradise Family Health Center (PFHC):

PFHC provides pediatric and adult care by pediatricians, family practitioners and internists. Over 16,000 patient visits are provided per year at the clinic that is located in the outpatient pavilion adjoining the Hospital.

While the South San Diego County area has an extensive network of community clinics, PVH clinics are an important contributor of primary care services providing almost as many patient visits as the emergency department with over 25,000 patient visits per year.

Skilled Nursing Services

The Acquisition Agreement also includes the sale of Paradise Valley Healthcare Center (PVHCC) that has 86 skilled nursing beds.² It is under a lease arrangement that will expire on August 31, 2012. The table lists the skilled nursing facilities within a ten mile radius of PVHCC. There are 18 non-acute based skilled nursing facilities (SNFs) within this area with most operating with high census levels. The table indicates that the 1,974 beds in that local area are occupied 85% of the time.

² It also has 50 residential care beds.

SUMMARY OF COMMUNITY INTERVIEWS

Interviews were conducted in November 2006 and January of 2007 at PVH and by telephone with numerous physicians, community members, and representatives from the Hospital, Prime and Adventist Health. MDS also attended an open meeting of the medical staff that was hosted by the Hospital and Prime. The purpose of the interviews was to gather information from area healthcare professionals and community members regarding potential impacts on healthcare availability or accessibility as a result of the proposed Hospital transaction. The major findings from over forty interviews are summarized on the following pages.

Reasons for the Sale of Paradise Valley Hospital

Adventist Health executives stated that they are selling PVH in order to preserve capital to make seismic and other improvements at its other hospitals. Adventist Health executives further stated that because the Hospital is a stand-alone facility in a difficult market with a poor payer mix, PVH is unable to make a financial turnaround. With an expectation of continuously increasing expenses and greater losses in future years, the Board of Directors viewed it as their fiduciary duty to find a purchaser that would continue to operate the hospital services rather than face closure in the foreseeable future as part of Adventist Health.

Acquisition by Prime

There was widespread public concern about Prime as the purchaser, because of:

- Its reputation and for-profit business practices as reported upon in various news articles;
- The potential cancellation of managed care contracts;
- The impact that managed care contract cancellation would have increasing costs of
 patient care to HMOs, capitated medical groups and capitated hospitals and
 potentially eliminating capitation contract methodologies resulting in higher costs to
 patients and employers;
- The potential for closure of programs and services;
- The potential for reduction in charity care services;
- Prime's emphasis on "medical management" of patients;
- A concern that Prime may not be able to operate PVH profitability and may only operate the Hospital for a five-year period and later convert it for real estate development purposes;
- A concern that Prime may not be able to operate PVH profitably and could go bankrupt before five years of operation;
- Prime's potential cancellation of on-call payment arrangements for physicians that would increase the shortage of specialists at PVH and cause additional financial burdens for neighboring hospitals; and

• The defection of physicians from PVH because of dissatisfaction with Prime's approach to management and service delivery.

A minority of those interviewed expressed support for Prime as the acquirer because they believe:

- The purchase price of \$30 million was viewed as fair given PVH's market conditions and operating losses;
- Prime would bring needed changes and facility and equipment improvements;
- Hospitals need to negotiate from a stronger position with managed care companies; and
- The Attorney General restrictions would require the continuation of services for at least five years.

Paradise Valley Hospital Sales Process

PVH and Adventist Health did not actively publicize the prospective sale of PVH nor issue a Request for Proposal, nor engage in a competitive bidding process. Adventist Health stated the reason was in order to avoid any disruption to the Hospital's delivery of healthcare services to the community. Many interviewed believed that as a result, other potential purchasers were excluded from the process.

Others expressed the view that it would be unlikely that any other purchaser would be willing or able to support a \$30 million purchase price and operate the Hospital in the long-term given the requirement for seismic improvements to PVH by 2013.

Some expressed concern that the sale price was lower than the market value of the property and buildings.

Importance of Paradise Valley Hospital to the Community

PVH is viewed as very important to the community for its provision of emergency, obstetrical, general acute care, behavioral health, and prevention services. Other services frequently mentioned as important for healthcare access and availability include:

- Rehabilitation;
- Center for Wound Care and hyperbaric chamber; and
- The Paradise Senior Health Center and Paradise Family Health Center.

The directors of San Diego County Emergency Medical Services and County Mental Health emphasized the importance of the PVH emergency department and mental health services to maintenance of the safety net.

PVH is also viewed as very important to the community for its involvement in community improvement projects and as the largest employer in National City.

Potential Closure of the Hospital

All parties are concerned that the repercussions of SB 1953 seismic improvement requirements may eventually cause the closure of PVH. Adventist Health has stated that it will not make the improvements and has decided to sell or close the facility. Prime has stated it will agree to operate the Hospital for at least five-years and that they are evaluating plans to meet seismic requirements. Many interviewed expressed an opinion that it would be unlikely that PVH could financially support the replacement or retrofit of all its current services and still might face closure after five years.

Communication About the Sale

Widespread disappointment was expressed that the Hospital has not adequately involved the community leaders and medical staff in the planning and sales process.

Opposition to the Sale

Some interviewed expressed a desire to block or slow the sale to allow the potential for other parties to present purchase offers or to force Adventist Health to continue to operate the facility.

ASSESSMENT OF POTENTIAL ISSUES ASSOCIATED WITH THE ACCESSIBILITY AND AVAILABILITY OF HEALTHCARE SERVICES

Continuation of Paradise Valley Hospital as a General Acute Care Hospital

Prime has committed to accept conditions imposed by the California Attorney General to continue to operate the services of the Hospital for at least five years.

Prime has started to establish a track record of acquiring and "turning around" financially distressed hospitals. If Prime can turn around the financial performance of PVH, it may be able to finance seismic improvements for extended operation of PVH. Dr. Reddy, Chairman of Prime, has suggested that a more affordable approach to the \$82 million retrofit could be to replace a smaller bed complement at PVH (e.g. 100 beds) based on its current average daily census.

However, unless a combination of the following occurs, it is unlikely that any owner would acquire PVH and commit to \$82 million dollars of improvements necessary to continue current operations beyond 2013:

- Relaxation of the 2013 date for seismic improvements;
- A significant financial turnaround;
- Legislative, grant, donor or other types of relief or financial contribution; and
- Significant program, service and operational changes.

Impact on the Safety Net

Similar to other communities in California, south and central San Diego County are anticipated to have major problems over the next few years maintaining inpatient safety net services. The requirement for hospitals to meet SB 1953 seismic standards threatens the continued existence of PVH and Scripps Chula Vista as general acute care hospitals and puts a total of 474 licensed beds at risk for closure. In 2005, these hospitals had an average daily census of 328 patients. If closed, area hospitals could not absorb the additional patient demand.

Additionally, UCSD Medical Center – Hillcrest (11 miles from PVH) is planning a move of inpatient services to La Jolla that will remove additional area beds further threatening safety net services.

A commitment to operate current services at PVH by Prime will at least continue safety net services for five years, and Prime expects to find a seismic solution that enables them to continue operating beyond five years. Alternatively, Adventist Health has indicated that it would likely close PVH well within the five-year period.

Medical/Surgical, Definitive Observation, Intensive Care/Coronary Care Services

An analysis of the current supply and demand of area hospital beds shows that there is a sufficient number of beds in the service are, however, population growth, population aging, disaster preparedness requirements and uncertainty about the effects of future hospital moves and closures makes PVH an important resource for general acute care beds.

Obstetrical Services

PVH provides over 2,000 deliveries per year, with the majority of patients under the Medi-Cal program. It is an important local service and other area hospitals would have difficulty absorbing PVH's delivery volume if the obstetrical service was closed.

Emergency Services

PVH, with 20 emergency beds and almost 40,000 visits in 2005 has a busy emergency department with little extra capacity. While other area emergency departments have capacity they could not absorb the volume of patients from PVH without creating problems for accessibility and availability. As previously discussed, PVH's emergency department is needed for patient access and is ranked as being very important by the County Director of Emergency Medical Services.

Paradise Valley Health Clinics

PVH operates the Paradise Senior Health Center close to the campus and the Paradise Family Health Center on campus. While San Diego's southern county area has an extensive network of community clinics, PVH clinics are an important contributor of primary care services providing 25,000 patient visits per year, which is over 60% of the number of patient visits at the Emergency Department.

Psychiatric Services

PVH is the largest provider of psychiatric services in San Diego County. Between the adult and adolescent services at PVH and Bayview, the average census historically has been over 80 beds. Approximately 55% of patients are covered under Medi-Cal and 36% are under Medicare. Excluding the County, which makes only a limited number of beds available for County indigent patients, other providers do not have the capacity to absorb the patient volume from PVH. The interim director for County Mental Health Services believes that it is very important to keep the psychiatric services of PVH open.

Rehabilitation Services

PVH is the market leader in providing rehabilitation services in its service area. The majority of patients have Medicare coverage with patients covered by Medi-Cal being a distant second. PVH's overall market share in the service area is 46% for rehabilitation services demonstrating its importance as a provider to local patients.

Neonatal Intensive Care Unit and Pediatrics

The average daily census for these services is approximately two patients each which is relatively low. These services are frequently provided by larger tertiary hospitals on a regional basis and patients in the PVH service area could easily be accommodated at other area facilities.

Reproductive Health Services

Tubal ligations and other reproductive health services are not prohibited at PVH, and the sale is not expected to change or reduce the availability or accessibility of these services.

Effects on Services to Medi-Cal, Medicare, County Indigent and Other Classes of Patients

PVH serves a large proportion of Medi-Cal, Medicare and County indigent patients. Approximately 39% are under Medi-Cal, 32% of patients are under Medicare, and 4% are indigent. Prime has committed to assume PVH's Medi-Cal contract, has submitted its Medicare enrollment application, and has agreed to provide services to charity care patients. While Prime may not contract with health plans for capitated providers for Medi-Cal or Medicare managed care, patients could still access PVH. Without contract rates, the payer would still be limited to paying the costs based upon traditional Medi-Cal and traditional Medicare reimbursement.

Effects on the Level and Type of Charity Care Historically Provided

PVH has a much higher percentage of uncompensated care charges as compared to hospitals in the State of California. In 2005, PVH had uncompensated care charges of 5.1% of total charges as compared to 3.1% for the State.

Prior to 2005, uncompensated care was in a range of 6.0% to 6.8% for PVH as compared to 2.9% to 3.3% for the State of California. From 2001 through 2004, the cost of uncompensated care had a range of \$6.5 million to \$7.9 million.

| Source: OSHPD D |)isclosure R | enorts PVH's | fiscal vear | s ends 12/31 | | | | | |

While not addressed in the Acquisition Agreement, Prime has stated its willingness to commit to providing historical levels of charity care.

Effects on Community Benefit Programs

PVH has historically provided a significant amount of community benefit services with over \$1.2 million in costs provided in 2005 to support community education and prevention, patient transportation, etc.

While not addressed in the Acquisition Agreement, Prime has stated its willingness to commit to providing historical levels of community benefit services.

Effects on Staffing and Employee Rights

PVH employees are not represented by unions. Prime has agreed to continue the employment of substantially all employees with similar benefits. Because Prime's intent is to continue to operate most current services, expand services and add new services, the sale is not expected to affect most non-management employees.

Effects on the Medical Staff

While Prime has committed to maintain the medical staff privileges of physicians in good standing, many have expressed the expectation that physicians may leave to other hospitals because of dissatisfaction with Prime as the buyer.

Effects on Patient Access

Prime will not be assuming the current managed care contracts and HMO patients may not have access to the Hospital except on an emergency basis. While it is possible that access may be more difficult for HMO patients' elective care, PVH is not currently serving a large number of commercial managed care patients (only 8%), and access for these patients could be achieved at other area hospitals. Some have concerns that patients will be subject to collection efforts from the Hospital or health plans. Prime's CEO indicated that it would not pursue the HMO enrollees for emergency service charges.

Alternatives

If the proposed transaction were not approved, PVH may face sale under less desirable circumstances or potential closure.

CONCLUSIONS

Overall, when compared to the alternative of closure of some or all services by Adventist Health, the sale of the Hospital to Prime is likely to be beneficial for at least five years of expected operation with few negative impacts on the availability and accessibility of healthcare services. In conjunction with Prime's intended capital contributions, their acquisition of PVH could lead to an expansion and improvement of services. Additionally, if Prime can operate PVH successfully it may be able to financially support the costs for the seismic improvements that would be necessary to operate beyond 2013.

Acquisition Agreement Mitigation Measures

In the Acquisition Agreement, Prime has agreed to only limited measures to mitigate or eliminate any potentially significant adverse impacts on the availability or accessibility of healthcare services to the affected community as described below:

- 1) Purchasers have agreed to adhere to the existing charity and indigent care policies in existence at Prime's other hospitals.
- Purchasers have agreed that those members of the medical staff who are in good standing as of the date of the closing shall maintain medical staff privileges after the closing.
- 3) Purchasers have agreed to form a local board that will include local community leaders.
- 4) Purchasers have agreed to assume Paradise Valley Hospital's Medi-Cal contract.
- 5) Purchasers have agreed to accept conditions imposed by the Attorney General that are reasonably related to ensuring that Purchasers continue to preserve current hospital services and continue to provide current charitable medical services and community benefit programs.

The Acquisition Agreement does not specifically address the continued operation of services. However, many of the additional conditions recommended by MDS and listed below have been agreed to in concept by Prime (verbally) in order to further mitigate negative impacts.

Potential Conditions for Transaction Approval by the Attorney General

- 1. Prime should continue to operate PVH as a general acute care hospital and maintain the emergency services with at least current licensure and types and levels of service for at least five years.
- 2. Prime should maintain the following types of services for at least five years:
 - Medical/surgical beds or units at current licensure and levels of services;

- Obstetrics at current licensure and levels of service;
- Adult intensive care and coronary care units at current licensure and levels of service;
- Rehabilitation at current licensure and levels of service; and
- Center for Wound Care and hyperberic chamber at current levels of service.
- 3. Prime should maintain Behavioral Health Services (Adult and Adolescent) at Bayview Behavioral Health and PVH for at least five years at current licensure and types and levels of service. Alternatively, at least six months before the Bayview lease expires, Prime could either:
 - a) Submit a plan that is acceptable to the Attorney General for moving the behavioral health services from Bayview to the main PVH campus that would have sufficient capacity to support 80 patients (the combined historical census levels) for at least 5 years; or
 - b) Submit an alternative operator that has been approved by the Lessor of Bayview and is acceptable to the Attorney General that would commit to operate Behavioral Health Services at current licensure and types and levels of service for at least 5 years.
 - There can be no closure of or change in current licensure and types and levels of services at Bayview Behavioral Health without receipt of written approval of alternatives (a) or (b) above from the Attorney General, the California Department of Health Services, and the California Office of Statewide Health Planning and Development.
- 4. Prime should commit to provide the same types and levels of services to Medicare and Medi-Cal patients and participate in the Medi-Cal and Medicare programs for as long as it operates PVH as a general acute care hospital.
- 5. Prime should accept and comply with the five-year lease extension renewal of Paradise Valley Health Center that allows for its current operation of the skilled nursing and assisted living facility on the campus of PVH.
- 6. Prime should commit to not seek balance billing against managed care contract enrollees.
- 7. Prime should continue to operate the Paradise Senior Health Center and the Paradise Family Health Center with the current type and levels of service for at least five years. Alternatively, Prime could find an alternative operator that is acceptable to the Attorney General that would commit to operating the Centers with current levels of service for at least five years.

There can be no closure of or change in current licensure and types and levels of services at the Centers without receipt of written approval an alternative operator from the Attorney General, the California Department of Health Services, and the California Office of Statewide Health Planning and Development.

- 8. Prime should utilize the Paradise Valley Hospital Foundation's Board, which is made up of medical, business and other community leaders as a review body prior to initiating any changes to Hospital services, community benefit programs, or charity care policies.
- 9. Prime should continue to expend \$2.5 million in annual charity costs³ (not charges) for at least five years. The amount of any annual shortfall in charity care should be contributed to a nonprofit public benefit corporation that provides medical patient care to residents in the service area.
- 10. Prime should continue to expend an average of at least \$1.2 million annually in community benefit services for at least five years that includes continued support for patient transportation (as legally permissible), Center for Health Promotion, and free health education classes in English and Spanish. Community benefit commitments shall be decided upon in conjunction with input from the Paradise Valley Hospital Foundation.
- 11. Prime should continue to seek and participate in the ALLY Grant Programs (ALLY National City Grant and ALLY South Bay).
- 12. Prime should commit to at least \$5 million in capital expenditures over the next five years in order to make capital equipment and plant improvements.

Recommended Action

Medical Development Specialists, Inc. recommends conditional approval of the proposed transaction subject to acceptance of the mitigation measures described in the previous section.

³ OSHPD defines charity care by contrasting charity care and bad debt. According to OSHPD, "the determination of what is classified as ...charity care can be made by establishing whether or not the patient has the ability to pay. The patient's accounts receivable must be written off as bad debt if the patient has the ability but is unwilling to pay off the account."

Appendix

Interviews were conducted with the following people:

Alfredo Aguirre - Interim Director, San Diego County Mental Health Services

Ari Albala, MD - Medical Director of Behavioral Health Services, PVH

Carmel Angelo – County Emergency Medical Services Director

Barbara Baynton – Director Patient Relations, PVH

Melanie Betancourt – Director Charity Care, PVH

Greg Bishop, MD - Chair, Psychiatric Committee, PVH

Trisha Brereton - President, Foundation, PVH

Robert Carmen – Executive Vice President & COO, Adventist Health

Donna Crowley, MD - Past Chief of Staff, Medical Director for Rehabilitation Services, PVH

Terry Day – VP of Hospital Finance, Adventist Health

Kathy Downs – Director Medical Staff Office, PVH

Gillian Doxzon – Director, Emergency Services, PVH

Sue Elenbas – Director Home Health, PVH

Steve Escoboza, CEO (PVH) Hospital Association

Genaro Fernandez, MD - Cardiology "PVH"

Jay Flaherty – Director of Rehabilitation Services, PVH

Blanca Fresno, MD - Medical Director & Chair of Pediatric Committee, PVH

Gary Friedstad – Manager Charity Care, PVH

Adolfo Gonzalez - Chief of Police, National City

Elmer Harder, MD - Medical Staff and Board Member, PVH

Greg Knoll – Director of the Consumer Center for Health Education and Advocacy in San Diego

David Levinsohn – CEO, Sherman Oaks Hospital

George Lewis – Director, Senior Center, Pediatrics/Clinic, Cardiology Services, PVH

Jack Lungu – Associate Vice President, PVH

Adele Lynch - University of San Diego Patient Advocacy Representative

Brenda Mack – Bell – Healthy Beginnings Program Representative

Paul Manos, MD - Medical Director, Emergency Department, PVH

Ben Medina, MD – Medical Director, Senior Center, PVH
